Professional Summary

Physics undergraduate student with a GPA of 3.52 and research internship experience at the National Research and Innovation Agency (BRIN). Experienced in scientific research environments, laboratory support activities, data analysis, technical documentation, and research reporting. Skilled in processing and interpreting scientific data, preparing structured reports, and supporting research workflows. Strong analytical thinking, attention to detail, problem-solving abilities, and English proficiency for technical communication.

Education

Universitas Negeri Malang

Bachelor of Physics

[2022] – Present

GPA: 3.52 / 4.00

Relevant Coursework:

- Experimental Physics
- Data Analysis
- Computational Physics
- Numerical Methods
- Mathematical Physics
- Quantum Physics

Internship Experience

Research Intern – Badan Riset dan Inovasi Nasional (BRIN)

July 2025 – January 2026

- Supported research activities within the Quantum Physics Research Center through scientific data processing, technical assistance, and research documentation.
- Assisted researchers in organizing, analyzing, and interpreting scientific data to support research activities.
- Prepared technical reports and documented research procedures and results.
- Performed data processing and visualization to improve data interpretation and reporting.
- Participated in the development and assembly of **Quasi-10 and Quasi-11 computing clusters** to support scientific research infrastructure.
- Assisted system setup, testing, and troubleshooting in a Linux-based research environment.

Research Project Experience

Scientific Data Analysis and Computational Research Project

Universitas Negeri Malang

2025 – 2026

- Developed Python-based computational approaches for scientific data analysis.
- Processed numerical data and generated visual representations to identify physical trends.
- Applied analytical methods to evaluate research results and support scientific interpretation.
- Prepared technical documentation and research summaries.

Technical Skills

Laboratory and Analytical Skills

- Scientific data analysis and interpretation
- Technical reporting and documentation
- Research workflow management
- Data processing and visualization
- Problem identification and troubleshooting
- Basic quality control awareness

Computational and Software Skills

- Python (NumPy, SciPy, Matplotlib)
- Microsoft Office (Word, Excel, PowerPoint)
- Linux / Bash Command Line
- Git / GitHub
- LaTeX
- Jupyter Notebook
- Quantum ESPRESSO

Quality and Research Knowledge

- Basic understanding of quality control concepts
- Data-driven problem solving
- Scientific reporting principles
- Research documentation standards
- Basic root cause analysis approach

Languages

- Indonesian – Native
- English – TOEFL ITP Score: 557; EF SET Score: 68 (CEFR C1)

Additional Skills

- Attention to detail
- Analytical thinking
- Team collaboration
- Adaptability
- Technical troubleshooting
